

# MAKING LAKE MARTIN GREAT,

# One Smile at a Time

BY BRANDI WEAVER

Born in Miami to Cuban immigrant parents, Dr. Nilo Hernandez had never seen snow until he attended dental school at Creighton University in Omaha, Nebraska.

Dr. Hernandez is married to Ely, a realtor; they have two children. One is in Law school in Florida, and the other is in medical school at Auburn.

While being pet owners, they have three dogs and spend most of their time with those lovely companions when not working or riding their Harley Davidson. It all began in 2018 when Dr. Hernandez's brother-in-law moved to Alabama to run a hospital. The trips started monthly to this beautiful area called "God's Country" to ride their motorcycles.

The monthly trips became more common as time passed until they decided to sell their Florida practice and relocate to Bama. As luck would have it, their son got into medical school at Auburn, and they found a home on Lake Martin. Their home was perfect, tranquil, and serene. Dr Nilo (as he is known in dental circles) began pursuing his new business and writing some books he had been working on for some time.

Dr. Nilo decided to investigate opening a small mom-and-pop dental office with a dental training center to continue his passion for dentistry and teaching. Constructing a dental office near their home at the new Stillwater strip center was planned. The area needed a dentist offering comprehensive care and dental implants with a holistic approach to wellness.

As a dentist for nearly 35 years, Dr. Nilo's passion for improving the dental arena grew into the research and development areas on

finding solutions to dental problems with no known solutions in the industry.

For over 25 years, Dr. Nilo has taught dentists from across the U.S. and abroad different techniques and methods to improve patient care. In doing so, he found that he was advising many colleagues to purchase various equipment and technology. The culmination of these guidance situations led to the creation of his other company, Quantum Health, to help dentists acquire the best equipment and supplies, but more importantly, to show them exactly how best to use those and incorporate them into their everyday dental practices.

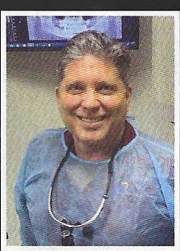

Today, the dental practice is open to serving the area's patients while creating the opportunity to continue developing techniques and methods to help improve people's lives.

The SmileCreator was born out of necessity and the need for a unification of resources to reach Dr. Nilo's dental legacy goals better. As a dentist, teacher, and author, Dr. Nilo has developed cutting-edge procedures to assist patients with better alternatives and support the aging population.

The area's citizens are all invited to come by and visit the most advanced dental center with all the latest technology available in dentistry today. SmileCreator gives people the highest level of support to maintain and improve their oral health in a more natural and holistic way. Welcome to the SmileCreator of Alabama.
